Thanks to Freight Forwarding and Logistics, cars from Germany, bananas from Costa Rica, and laptops from China are available in South Africa and many other countries. Agents for Freight Forwarding and Logistics organise the shipping and storage of goods in national and international freight traffic. They advise customers, calculate offers and carry out shipping and deployment planning.

The SA-German Chamber of Commerce and Industry offers a 3-year dual training programme, combining theoretical learning and practical experience through its competence centre for education and training and a network of business partners.

Young professionals spend four days a week gaining practical learning in companies and one day studying theory at a vocational school.
